Ajax	jQuery	- SQL

Skills

Extensive experience managing & participating with teams
Positively represent a company to current & future clients
Self-motivated to complete work with excellence & in timeliest manner possible

Projects

NASHPLORATION

Currently developing Hack4Change winning project. Nashploration is a civic educational application for the City of Nashville to host and implement in schools (nashploration.com).

MUSE COLLECTIVE

The first half of NSS spanned the entire stack, from Node.js within the Express Framework to front-end Javascript, HTML, CSS and more. This project utilizes all this in making a tool for creatives to brainstorm, collect their ideas and collaborate on projects (musecollective.nathanhood.me).

THIRTEEN VIRTUES

The second half of my time at NSS focused on Ruby, Rails, TDD and lower level discussions about object oriented programming. The goal of this application was to hone in my TDD knowledge and better acquaint myself in the Rails environment (thirteenvirtues.herokuapp.com).

Education

Nashville Software School; Nashville, TN - 2014
Hillsong International Leadership College; Sydney, Australia - 2008-2009
Washington State University; Pullman, WA - 2006-2007 (General Studies)
